

Design Credits

Discover true flexibility with our Credit-Based Design System. Each design task—big or small—has a transparent credit value, so you know exactly what you’re getting with every request. Use your monthly credits however you like across any service: UI/UX, creative graphics, motion graphics, or product design. Unused credits roll over for three months, and custom quotes are available for unique or complex projects. With Avicen AI, you get total control, expert results, and delivery times that fit your schedule—all powered by a seamless AI-human workflow.
